

## Navigating Content

The **Content** section of your course is where you will find any files, readings, or instructions your instructor has added. You can access **Content** from the Navbar at the top of the screen.

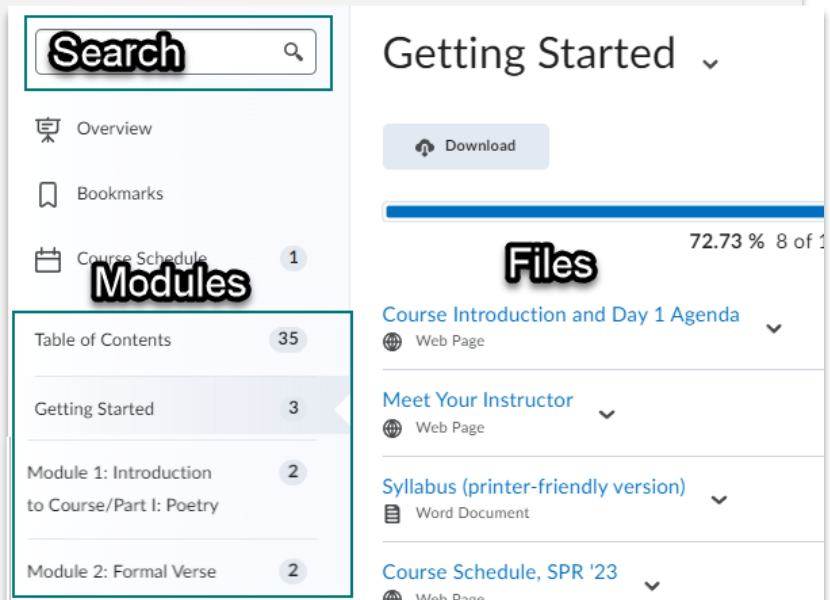

## Modules

Course content is organized into **modules**. You can move between modules in the menu on the left side of the screen.

**Table of Contents** will show all files in the course, or you can open individual modules to view files. You can also **Search for Topics** using the search box at the top.

**Pro Tip:** Look for a **Getting Started** or **Start Here** module to find the syllabus

## Downloads and Alternative Formats

You can download most any file to your personal computer for offline viewing. Select the drop-down arrow next to the page title and **Download**.

You can also download files in **Alternative Formats** (such as audio) if you need them. Select the **A** icon on the right side of a file and then choose your desired file type.
